

Maintenance Instructions:

Laminate flooring is virtually maintenance-free. Routine cleaning requires you only to vacuum, use a dust mop, or a slightly damp (not wet) mop and dry with a clean, white cotton cloth. The only product that you will need to use to clean your floor on a regular basis is Quick Step Quick Clean.

NEVER use a wax, polish, oil or varnish coating on the floor. Do not use soap-based detergents, oil soaps, or one-step clean and shine type products, or any product that squirts liquid directly on the floor.

For dry maintenance, use a dust mop or vacuum cleaner. Avoid vacuum attachments with 'beater bars', which could damage your floor.

For damp maintenance: Apply diluted QS Quick Clean cleaning product or water lightly to dry, soft cloth (never directly to the floor), wipe over floor. **(Never use other cleaning products or detergents!)** This product cleans the floor very well and leaves a satin shine. **Only use a WELL WRUNG OUT CLOTH. ALWAYS WIPE DRY IMMEDIATELY AFTER** until no moisture is visible on the floor. If you do not wipe it dry, the Quick Clean product has virtually no effect.

WET MAINTENANCE IS ENTIRELY FORBIDDEN! Never wet mop or use wet or steam cleaners on your floor.

Remove stubborn stains carefully with Quick Step Force or a little acetone on a soft cloth. Never use steel wool, abrasive cleaners, or scouring powder, as they will scratch your floor.

Quick Step laminate is based on pre-treated, watertight glued HDF board. Despite Quick Step laminate's relative moisture resistance, remove any excess water immediately.

Enjoy your floor!
